Marco Caramazza,

"Delta"

Systems Designer

About Me

A systems designer and game developer with a background in Computer Science and a designer's eye for systems, building games and VR applications that range from online multiplayer projects to a voice-driven AI agent running on Meta Quest, and used to working remotely alongside international artists and communities. Looking for a team where every idea really matters, where I can bring both my code and my art into new projects I can fall in love with.

Politecnico di Milano - *Computer Science Master's Degree*
SEP 2024 – DEC 2026

- Advanced User Interfaces, Video Game Design and Programming (C#), Online Game Design (C#), Computer Graphics (C++), Foundations of Artificial Intelligence

Università degli Studi di Palermo - *Software Engineering Bachelor's Degree*
SEP 2020 – MAR 2024

Strengths

Dependability | Reliable under pressure, delivering high-quality work on tight timelines. | Met every deadline across 5+ years of high-stakes art competitions and project work, with 3 confirmed wins.

Leadership & Moderation | Skilled at guiding groups and coordinating people, with strong communication across creative and organizational contexts. | Moderated a 900+ member global Discord comics community for over 2 years, while also collaborating with diverse international artists for further collaborative projects.

Systems Thinking | My deep passion for tabletop gaming has driven me to write new mechanics, balance adjustments, and narrative content for D&D campaigns and the likes.

Empathy | Developed a broad, creative and human perspective through all the connections with my many international peers.
