Skills

Languages |

English - 8.0 IELTS (C1)
Italian - Native

Programming Languages |

Java, C#, C, C++, Kotlin

Tools & Practices |

Git, Unity, Agile/Scrum, SQL

Foundations |

Object-oriented programming, software engineering principles, optimization algorithms, AI & ML

Junior developer finishing a Computer Science Master's at Politecnico di Milano; equally at home in systems design and in creative, multi-disciplinary teams, managing complex projects from concept to release. Looking for opportunities to use my experiences to solve real-world engineering problems

Work Experience

Asperger Lab Milano - Co-designer, VR-Programmer

MAY 2026

- Unity VR app for social-skills practice in a safe, therapeutic setting
- Built on user research with therapists & patients
- **Thesis Project**

Hivemind - Co-founder & Developer, Game Project

MAR 2026 - MAY 2026

- Unity/C#
- Online Multiplayer
- Art Director for the project
- **Winner** of Unimi's New Game Designer

Education

Politecnico di Milano - Computer Science Master's Degree

SEP 2024 - DEC 2026

- Advanced User Interfaces | 30/30
- Technologies For Information Systems | 30L/30
- VideoGame Design and Programming | 30/30
- Machine Learning | 28/30
- Foundations of Artificial Intelligence | 28/30

Università degli studi di Palermo - Software Engineering Bachelor's Degree

SEP 2020 - MAR 2024

- Software Engineering
- Mobile and Web Programming
- Java Coding
- Databases

Strenghts:

Dependability |

Reliable under pressure, delivering high-quality work on tight timelines. | *Met every deadline across 5+ years of high-stakes art competitions in my free time and academic project work,*

Leadership & Moderation |

Skilled at guiding groups and coordinating people, with strong communication across creative and organizational contexts. | *Moderated a 900+ member global Discord community for over 2 years, while also collaborating with diverse international artists for further collaborative projects.*

Systems Thinking |

My deep passion for interactive technologies has driven me to always look for new solutions to emerging problems, always putting the user first. | *This has been the entire focus of my thesis*

Empathy

Developed a broad, creative and human perspective through all the connections with my many international peers.
